

Amit Sheen - resume

Hey guys, nice to meet you.

I'm a full-stack coder with an extensive experience in characterizing and developing advanced client-side applications, and a special affection for gamification of complex systems. I'm also a gadget freak, game maker, Sci-Fi enthusiast, autodidact, a wannabe musician, and a former chef.

Work experience:

Apr 2017 - Present

Self employed (freelance coder & tech consulting)

Developing unique applications and web interfaces for various companies, start-ups, and individuals.

During my time as a freelance, I have built MVPs for stratup companies like Wis2Biz and img.G, developed web moduls for clients such as Ayalon, HomeDiet, and Bcount, and advised several startups like LiveTrip, Rewizit, WeConn, Maaglim, and more. (Full recommendations will be provided upon request)

Aug 2016 - 2017

Picard (founder)

With Picard, you can safely share and display images online - using a unique patented technology that displays a clear image, but prevents the viewer from saving, downloading, and even capturing the image. It is the only available solution that utilizes an optical illusion to protect images online, stops the image theft at its core, and keeps the image completely secure.

Jan 2014 - Aug 2016

zigrow (co-founder/CTO)

We help cannabis growers maximize the plants' yield, by monitoring, analyzing, and improving their grow process, thereby allowing any grower to achieve the best possible results, even without any previous experience, while using less effort and minimal expense.

zigrow merges hardware, software and knowledge to create one comprehensive solution that provides indoor cannabis growers with a wide selection of advance services, and makes sure their plants grow stronger, bigger and more fruitful than ever before.

Aug 2013 - Apr 2015

Green&Brown (web and app developer)

A small boutique company that specializes in developing challenging projects that require a lot of attention to detail and end-to-end service.

Previous positions:

Mar 2011 - Aug 2013

magiClass (brand manager and web developer)

Mar 2010 - Oct 2010

Blazer (sales manager)

Before 2010

I completed my military service in 2002 as a first sergeant in the 460th Brigade, passed a full year course in the Culinary Arts on behalf of the Ministry of Labor and functioned for several years as a cook/chef in a number of kitchens in the Tel Aviv area. after that, I had various sales positions and low/mid level management roles in companies like Bezeq, AScom, Yellow Pages, and more.

Why work with me?

First off, I love what I do, and proud of it. I'm agile, versatile, learn fast, and work faster. Besides, people say I'm a pretty nice guy, it's up to you to prove them wrong.
